GMHA Statement on Resumption of Vascular Procedures

Tamuning, Guam — The Guam Memorial Hospital Authority (GMHA) confirms that vascular surgeries have resumed effective yesterday, April 1, following a brief precautionary suspension implemented on March 27 to ensure continued patient safety and adherence to the highest standards of care.

The temporary suspension occurred just prior to the scheduled replenishment of necessary vascular supplies. GMHA has since received the anticipated shipment, allowing for the safe and timely resumption of these services.

No impacts to patients were observed during the suspension period, and none were anticipated. Throughout this time, medical providers continued to manage patient care using appropriate alternative interventions and treatment options to ensure continuity of care.

No other hospital services or procedures were affected, and all departments continue to operate as normal.

GMHA remains committed to patient safety, transparency, and the delivery of quality healthcare services to the people of Guam. We appreciate the community's understanding and continued support.
