## GMHA Clarifies Leadership Status Amid Circulating Misinformation

(Tamuning, Guam; March 18, 2026) — The Guam Memorial Hospital Authority (GMHA) is aware of misinformation circulating in the community regarding hospital leadership.

Dr. Joleen M. Aguon has not resigned and continues to actively lead hospital operations and response efforts.

As the hospital manages the current oxygen supply situation, GMHA remains focused on supporting its staff and ensuring safe, uninterrupted care for patients.

“We understand that situations like this can cause concern, especially when information is shared quickly,” GMHA stated. “We want our community to know that leadership remains in place, our teams are working together, and patient care continues without disruption.”

GMHA continues to work closely with island partners to monitor the situation and maintain stability across operations.

The hospital encourages the community to rely on official updates for accurate information.
