GMHA Meets with Chuuk State Health Insurance Board to Explore Regional Healthcare Collaboration

(Tamuning, Guam; March 18, 2026) — The Guam Memorial Hospital Authority (GMHA) recently hosted representatives from the Chuuk State Health Insurance Board for discussions focused on expanding regional healthcare collaboration and improving access to services for the people of Chuuk and the broader Federated States of Micronesia (FSM).

“Regional collaboration is essential to ensuring that patients throughout Micronesia have access to the care they need. These discussions mark an important step toward strengthening healthcare partnerships and building more coordinated pathways for patients in Chuuk and across the Federated States of Micronesia,” said GMHA Interim Hospital Administrator and CEO Dr. Joleen M. Aguon.

“Our island has long served as a hub for healthcare in the region,” said Governor Lou Leon Guerrero. “Strengthening partnerships with our neighbors in the Federated States of Micronesia helps ensure that families across our region have access to quality care and the medical services they need.”

“This collaboration reflects our shared commitment to improving health outcomes for our communities,” added Lt. Governor Josh Tenorio. “Working together allows us to build stronger systems of care and ensure patients can access services in a more coordinated and timely manner.”

GMHA remains committed to working collaboratively with regional healthcare partners to strengthen healthcare services and support the health and well-being of communities throughout the Pacific.
