GMHA Provides Update on Oxygen Supply; Elective Surgeries Resume

(Tamuning, Guam; March 24, 2026) — The Guam Memorial Hospital Authority (GMHA) is pleased to provide an update following last week's islandwide disruption in liquid oxygen supply.

GMHA has received an initial delivery of 700 gallons of liquid oxygen, providing meaningful relief as the hospital continues to manage through the ongoing supply situation. An additional delivery is expected later this week.

With supply levels stabilizing, GMHA has resumed elective surgeries that were temporarily rescheduled as a precautionary measure. The hospital continues to closely monitor its oxygen supply and overall operations to ensure the safety and continuity of patient care.

"We are grateful for the progress made and for the continued coordination with our supply partners," said GMHA Interim Chief Executive Officer and Administrator Dr. Joleen M. Aguon. "While we remain vigilant, we are encouraged by the steps forward and are committed to keeping our community informed."

GMHA will continue to monitor the situation and provide updates as warranted.
