## Statement on Temporary Suspension of Vascular Procedures

(Tamuning, Guam; March 27, 2026) — The Guam Memorial Hospital Authority (GMHA) confirms that vascular surgeries were temporarily suspended today, March 27, as a precautionary measure to ensure continued patient safety and adherence to the highest standards of care.

This temporary suspension is occurring just prior to the scheduled replenishment of necessary vascular supplies. GMHA expects the delivery of these supplies next week, at which time services are projected to resume promptly.

At this time, there has been no impact to patients, and none is anticipated during this brief suspension period. Medical providers continue to manage patient care using appropriate alternative interventions and treatment options where necessary to ensure continuity of care. No other hospital services or procedures have been affected, and all other departments continue to operate as normal.

GMHA remains committed to patient safety, transparency, and the delivery of quality healthcare services to the people of Guam. We appreciate the community's understanding and will provide updates if necessary.
